Three Substances added to ECHA's **SVHC Candidate List**

Since January 2021, EU producers, importers, assemblers, and distributors of articles containing more than 0.1% of an SVHC on the Candidate List are obliged to notify the ECHA (Waste Framework Directive, WFD). This notification is published in ECHA's substances of concern in products (SCIP) database. Once a substance is placed on the Candidate List, companies have legal obligations when their substance is included either on its own, in mixtures, or articles.

On June 25, 2025, the European Chemicals Agency (ECHA) announced the addition of three substances to the Candidate list of substances of very high concern (SVHC) for authorization. This inclusion expands the number of entries on the Candidate List from 247 to 250.

Highlights of this revision are summarized below.

EUROPEAN CHEMICALS AGENCY, ECHA/NR/25/02, JUNE 25, 2025			
SUBSTANCE (NEW)	EC NO. / CAS NO.	CLASSIFICATION	EXAMPLES OF APPLICATION
1,1,1,3,5,5,5-heptamethyl-3-[(trimethylsilyl)oxy]trisiloxane	241-867-7 / 17928-28-8	Very Persistent, Very Bio-accumulative (vPvB)	<ul style="list-style-type: none">Adhesives, paints and coatingsAutomotive care productsCosmetics, fragrances, perfumes and personal care products
Decamethyltetrasiloxane	205-491-7 / 141-62-8	Very Persistent, Very Bio-accumulative (vPvB)	<ul style="list-style-type: none">Automotive care productsCosmetics and personal care productsPolishes and waxesWashing and cleaning products
Reactive Brown 51	466-490-7 / -	Toxic for reproduction	<ul style="list-style-type: none">Textile treatment products and dyes
